

CREATING THE PERFECT PHOTO-2-CANVAS PRINT

WWW.CANDID-CANVAS.COM

FOR DIGITAL PHOTOS:

- Please send photos taken from a digital camera only, do not send photos taken from a mobile phone or PDA.
- Please send photos at the highest resolution possible. Do not resize your photo in any way, please simply send the photo directly off of your digital camera "as is".
- Do not crop your photo. If you prefer your photo to be cropped for your canvas, please just specify this and our artist will crop it for you.

FOR SNAPSHOT PHOTOS:

- Please send your photo in a hardbacked mailer to prevent any damage to your photo. We will return your snapshot with your finished canvas.
- Do not submit a photo smaller than 3" x 5". We scan your photo and we cannot guarantee the quality of a canvas created from a smaller photo.
- Please do not cut or crop your photo in any way (if possible). If you prefer to only use part of a photo, simply explain this and our artist will crop it for you.

GENERAL TIPS FOR ALL PHOTOS:

- Shots where the subject occupies most of the frame are usually the most pleasing. Faces should be clear and crisp, any blurriness in a photo will only be accentuated after enlarging.
- Please make sure any important part of your photo is well within the photo edges. We most often take your rectangular photos and convert them to a square, while also wrapping the edges around to the back for a finished look. Any photo element too close to the edges of your photo will most likely be cropped off, or wrapped to the back of the canvas.
